

Costing software 4cost-cadcal

Product cost calculation
directly on the CAD model

Your benefits

- Early identification of cost drivers in development and design to reduce manufacturing costs and increase cost transparency
- Accelerated, well-founded decision-making through visibility of the cost impact of design decisions
- Minimisation of errors thanks to standardised calculation methodology and guided input workflows
- Company-wide consistent, comparable calculations for a common understanding of costs and greater acceptance among stakeholders
- Service guarantee: Comprehensive training programme for working with the software and technical support

Areas of application

- Costing during development and design
- Design-to-cost
- Design for manufacturability/assembly
- Work plan creation
- Value analysis

Top features

- Automatic analysis of 3D geometries
- Interactive CAD viewer
- Guided input
- Integrated, editable databases with country-specific benchmark data on materials, machines, tools and staff
- Relevant real-time reports with export
