

Costing software 4cost-prediction

Multidimensional
regression analyses
for precise cost forecasts

Your benefits

- Quick assessment of the appropriateness of costs and prices for various products and product groups using freely selectable parameters
- Precise identification of cost drivers, savings potential and outliers to derive specific actions
- Strengthened negotiating position in purchasing and consistent price argumentation in sales through feature-related, data-based insights
- Early profitability assessment and target price/target cost support as a basis for management decisions
- Service guarantee: Comprehensive training programme for working with the software and technical support

Areas of application

- Linear and non-linear performance pricing
- Should cost analysis
- Target costing
- Benchmarking

Top features

- Automatic selection of the ideal regression model
- Interactive, graphical display of results
- Processing of text parameters in addition to numerical values
- Relevant real-time reports with export
- Wizard for bulk import of data
