

Costing software 4cost-structure

Convenient bottom-up calculation
with any level of detail

Your benefits

- Consistent, transparent detailed calculations with high accuracy
- Significantly accelerated calculation processes and reduced error rates through automation
- Company-wide standardisation of calculation methods and facilitation of cross-departmental understanding of costs
- More efficient teamwork through central databases, shared calculation formulas and reusable calculation templates
- Seamless cost analysis across all project phases thanks to bidirectional data exchange between bottom-up and top-down calculation
- Service guarantee: Comprehensive training programme for working with the software and technical support

Areas of application

- Calculation of manufacturing costs
- Calculation of hardware and software development costs
- Quotation costing
- Preliminary and final costing
- Costing during development
- Should cost analysis and target costing

Top features

- Wizards, validation logic and templates to simplify complex entries
- Integrated benchmark data (material, machines, staff)
- Quick variant analyses and scenario comparisons
- Mapping of complete work systems including staff with all work steps and associated processing times
- Relevant real-time reports with templates and export
